Report of Independent Registered Public Accounting Firm

The Supervisory Board
voxeljet AG:

We have audited the accompanying consolidated statements of financial position of voxeljet AG and subsidiaries (the "Company") as of December 31, 2015 and 2014, and the related consolidated statements of comprehensive loss, changes in equity, and cash flows for each of the years in the three-year period ended December 31, 2015. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of voxeljet AG and subsidiaries as of December 31, 2015 and 2014, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2015, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Basis of preparation

1. The reporting entity

voxeljet AG (in the following referred to as '*voxeljet*', 'Group', or the *'Company')* is a high-tech company headquartered in Friedberg, Germany. The *Company* consists of voxeljet AG (formerly Voxeljet Technology GmbH), voxeljet America Inc. (*voxeljet America*), voxeljet UK Ltd. (*voxeljet UK*) and voxeljet India Pvt. Ltd. (*voxeljet India, established in November 2015*). voxeljet AG owns 100% of the issued and outstanding shares of *voxeljet America* , *voxeljet UK* and *voxeljet India.* As a manufacturer of three-dimensional ("3D") printing systems, *voxeljet* specializes in the development, production and distribution of industrial printing machines and the sale of customized printed products to industrial customers. The *Company* operates in two business divisions: Systems and Services. The *voxeljet* Systems business division creates innovative 3D printers. Today, *voxeljet* has a product range that reaches from smaller entry models to large-format machines, and therefore offers 3D printer systems for a wide range of application areas.

Through its Services business division, the *Company* also offers customized printed products such as sand molds and plastic models based on CAD data through its 'on-demand production' service center. In addition, the *Company* offers casting services to its customers. In those cases, the casting process is performed by external suppliers supported by *voxeljet's* molds and models. Small-batch and prototype manufacturers utilize the *Company's* machines for the automatic, patternless manufacture of their casting molds and 3D models. The *Company's* customer base includes automotive manufacturers and suppliers as well as companies from the arts and design industries.

2. Preparation of financial statements

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (IFRS) as set forth by the International Accounting Standards Board (IASB) and interpretations of the IFRS Interpretations Committee (IFRIC). The designation IFRS also includes all valid IAS; the designation IFRIC also includes all valid interpretations of the Standing Interpretations Committee (SIC).

The consolidated financial statements were authorized for issue by the Management Board on March 31, 2016.

The consolidated statement of financial position is structured in accordance with IAS 1, separating current from non-current assets and liabilities. Assets and liabilities are classified as current if they are expected to be realized within twelve months after period end. These consolidated financial statements were prepared on the basis of historical cost except for the following items, which are measured on an alternative basis on each reporting date.

Available-for-sale financial assets	Fair value
Liabilities for cash-settled share-based payment arrangements	Fair value
Monetary assets and liabilities denominated in foreign currencies	Translated at period-end exchange rates

The consolidated financial statements are presented in thousands of Euros (kEUR) except where otherwise stated. Due to rounding, numbers presented throughout these notes may not add up precisely to the totals provided and percentages may not precisely reflect the absolute figures.

2. Preparation of financial statements (Continued)

The consolidated financial statements have been prepared on the assumption that the Group will continue as a going concern.

3. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all fiscal years presented.

Business combinations

Business combinations are accounted for using the acquisition method as at the acquisition date when control is transferred to the Group. Consideration paid is allocated to the assets acquired and liabilities assumed, with any excess amount recorded as goodwill.

Consolidation

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Intercompany balances and transactions are eliminated in preparing the consolidated financial statements.

Recognition of income and expenses

Revenues

Revenue from the sale of new or refurbished 3D printers is recognized upon the transfer of risks and rewards of ownership to the buyer, which is upon completion of the installation of the 3D printers at the customer site and evidenced through final acceptance by the customer. The *Company* also recognizes revenue from printers, which are provided to customers under operating leases. Deferred revenue from those transactions is recognized monthly on a straight-line basis. Revenue from the sale of custom-ordered printed products, consumables, or spare parts and other machine parts is recognized upon transfer of title, generally upon shipment. Revenue for all deliverables in sales arrangements is recognized to the extent that it is probable that the economic benefit arising from the ordinary activities of the business will flow to the *Company* and provided that the amount of revenue and the costs incurred or to be incurred in respect of the sale can be measured reliably. Revenue is measured at the fair value of the consideration received or receivable, which is fixed at the time of recognition of revenue. In instances where revenue recognition criteria are not met, amounts are recorded as deferred income in the accompanying statements of financial position.

The Group provides customers with a standard warranty agreement on all machines for up to one year. The warranty is not treated as a separate service because the warranty is an integral part of the sale of the machine. The provision associated with these warranty obligations was not significant in 2015 or 2014.

After the initial one year warranty period, the Group offers its customers optional maintenance contracts. Maintenance contracts are provided for a period of twelve months and automatically

3. Summary of significant accounting policies (Continued)

extended for another twelve months if not cancelled on a timely basis. Maintenance service revenue is recognized on a straight-line basis under the contractual term.

Shipping, packaging and handling costs billed to customers for machine sales and sales of printed products and consumables are included in revenue in the consolidated statements of comprehensive loss. Costs incurred by the *Company* associated with shipping, packaging and handling are included in selling expenses in the consolidated statements of comprehensive loss.

The *Company's* terms of sale generally require payment within 30 to 60 days after shipment of a product, although the *Company* also recognizes that longer payment periods are customary in some countries where it transacts business. To reduce credit risk in connection with machine sales, the *Company* may, depending upon the circumstances, require significant deposits prior to shipment. In some circumstances, the *Company* may require payment in full for its products prior to shipment and may require international customers to furnish letters of credit. These deposits are reported as customer deposits included in other liabilities and provisions in the accompanying statements of financial position. Occasionally, the *Company* provides loans for all or a portion of the purchase price of a machine sold by the Systems segment. Services under maintenance contracts are billed to customers in advance on a monthly, quarterly, or annual basis, depending on the contract and are included in deferred income in the statement of financial position.

In the course of the *Company's* ordinary business activities refurbished 3D printers, which were operating in the Services segment on average for 1.5 to 2.5 years, are routinely sold to customers. These 3D printers were operated in the production of manufacturing products ordered by customers. Prior to their sale, these 3D printers are generally fully refurbished, which includes setting up a new printhead. Proceeds from the sale of such refurbished 3D printers are recognized as revenue. The incurred costs and revenues are reported within the Systems segment.

Sales agents are used in connection with the sale of 3D printers. These sales agents receive a sales commission based on a percentage of the sale price for each sale initiated by them. Generally, the commission is paid only after the customer has paid the final invoice.

Research and development expenses

The *Company* is continuously involved in the research and development of new methods and technologies relating to its products. All research and development costs are charged to expense as incurred.

Government grants

Government grants awarded for project funding are recorded within other operating income in the consolidated statement of comprehensive loss if the related research and development costs have been incurred and provided that the conditions for the funding have been met. Until then, amounts received under government grants are recorded as deferred income in the statement of financial position.

Leases

Finance leases consist primarily of borrowings associated with sale and leaseback transactions involving 3D printers that were manufactured and used within the Services segment. Additionally, the *Company* has entered into finance lease agreements for 3D printers manufactured by others. Maturities of the finance leases extend to 2020. Leased assets are recognized at the lower of fair value or the

3. Summary of significant accounting policies (Continued)

present value of minimum lease payments and depreciated over the asset's estimated useful life. Assets under finance leases are included in "Property, plant and equipment" in the statement of financial position. Gains on sale and leaseback transactions are recorded as deferred income in the statement of financial position and recognized as "Other operating income" over the respective lease term.

Operating leases consist of various lease agreements for the rental of manufacturing facilities, office and warehouse space, vehicles, and office and IT equipment, expiring in various years through 2020. Rent expense under operating leases is charged to profit or loss on a straight-line basis over the term of the lease. *voxeljet* also rents certain of its 3D printers to customers under operating leases.

In 2015, *voxeljet* leased five 3D printers (2014: three 3D printers and 2013: four 3D printers) to customers under operating leases. Rental income is recognized on a straight-line basis over the term of the lease as revenue and is reported within the Systems segment.

Long Term Cash Incentive Plan

voxeljet has a Long-Term Cash Incentive Plan ("LTCIP"), a cash-settled share-based payment arrangement, that provides for cash awards to non-executive employees. Compensation cost is determined based on the grant-date fair value of the awards and recognized, net of estimated forfeitures due to termination of employment, on a straight-line basis over the requisite service period of the award and depending on the evaluation of certain performance and market conditions. The requisite service period is generally the vesting period stated in the award. The liability for these awards is measured at fair value at each reporting date until settlement and is classified within "other liabilities and provisions in the consolidated statement of financial position.

Foreign currencies

The financial statements are presented in Euros, the functional currency of *voxeljet AG*.

Monetary transactions denominated in foreign currencies are translated to Euros at the exchange rates prevailing on the transaction date.

The financial statements of foreign subsidiaries are translated using the concept of the functional currency in accordance with IAS 21. The assets and liabilities of foreign subsidiaries are translated at the spot rate at the end of the period, while their income statement items are translated at average exchange rates for the respective periods. All resulting exchange differences are recognized in other comprehensive income. Gains and losses on foreign currency transactions are shown within other operating income and other operating expenses, respectively, in the consolidated statement of comprehensive loss.

The loans provided to *voxeljet AG*'s subsidiary *voxeljet UK* and *voxeljet USA* are not considered as net investment. Consequently, gains or losses from foreign exchange differences thereon are recognized in other operating income or expenses.

3. Summary of significant accounting policies (Continued)

The exchange rates that are most relevant for *voxeljet's* consolidated financial statements are as follows:

Average exchange rates to Euro

Year Ended December 31,	Average Rate USD	Average Rate GBP
2015	1.1096	0.7258
2014	1.2329	0.8064
2013	1.3303	0.8493

Year end exchange rates to Euro

Year Ended December 31,	Year End Rate USD	Year End Rate GBP
2015	1.0859	0.7340
2014	1.2101	0.7789
2013	1.3779	0.8363

Income Tax

Income tax expense (benefit) consists of current and deferred tax expense and benefit in accordance with IAS 12.

Current income tax expense (benefit) is based on taxable profit (loss) for the year. Taxable profit (loss) differs from profit (loss) as reported in the statements of comprehensive income (loss) because it excludes items of income or expense that are taxable or deductible in other years and further excludes items that are never taxable or deductible. Current income tax expense (benefit) is calculated using tax rates that have been enacted or substantively enacted by the end of the respective reporting period.

Deferred income tax expense (benefit) is recognized on temporary differences between the carrying amounts of assets and liabilities in the statement of financial position and the corresponding tax basis used in the computation of taxable profit (loss).

Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets, including for carry forward losses to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer more probable than not that sufficient taxable profits will be available to allow all or a part of the assets to be recovered.

Deferred tax expense (benefit) is calculated at the tax rates that are expected to apply in the periods when the liability is settled or the asset is realized, based on tax rates (and tax regulations) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the *Company* expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax expense (benefit) is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred taxation is also recorded to equity.

3. Summary of significant accounting policies (Continued)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off tax assets against tax liabilities and when they relate to income taxes levied by the same taxation authority and the *Company* intends to settle its current tax assets and liabilities on a net basis.

Intangible Assets

Intangible assets, including software, licenses and customer relationships, that are acquired by the *Company* and have a finite useful life are measured at cost less accumulated amortization and any impairment losses. Amortization for intangible assets with finite useful lives is recognized on a straight-line basis over their useful lives. The amortization for the customer list and digital library arising from the purchase price allocation related to the acquisition of our subsidiary *voxeljet UK*, was presented within selling expenses and cost of sales, respectively. Goodwill arising from the acquisition of subsidiaries is not amortized and is measured at cost less accumulated impairment losses. Goodwill is tested annually for impairment.

The estimated useful economic lives of acquired intangible assets are presented in the following table:

USEFUL LIFE OF INTANGIBLE ASSETS

Software	3-5 years
Licences	6-8 years
Customer list	3 years
Digital library	3 years

An intangible asset is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in profit or loss in the period in which the item is derecognized.

Property, Plant and Equipment

Property, plant and equipment is carried at acquisition or manufacturing cost (for internally manufactured printers used in the Services segment) and depreciated on a straight-line basis over the estimated useful lives of the related assets, taking into account estimated residual values. Realized gains and losses are recognized upon disposal or retirement of the related assets and are reflected within other operating income or other operating expenses in the consolidated statement of comprehensive loss. Subsequent expenditures are capitalized only if it is probable that *voxeljet* will receive additional economic benefits from the particular asset associated with these expenditures, and the costs can be determined reliably. Repair and maintenance expenditures are expensed as incurred. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the *Company* will obtain ownership by the end of the lease term. Land is not depreciated. Additions to property, plant and equipment relating to self-constructed 3D printers are considered non-cash transactions.

3. Summary of significant accounting policies (Continued)

The estimated useful economic lives of items of property, plant and equipment are as follows:

USEFUL LIFE OF PROPERTY, PLANT AND EQUIPMENT

Leasehold improvements	6-9 years
Buildings	33 years
Plant and machinery	7-8 years
Printers leased to customers under operating lease	7-8 years
Other facilities, machinery and factory equipment	2-20 years
Office equipment	3-12 years

Useful lives, depreciation methods and residual values are reviewed at least annually and, in case they change significantly, depreciation charges for current and future periods are adjusted accordingly.

Inventories

Raw materials

Raw materials are measured at the lower of acquisition cost, as determined on the first-in, first-out (FIFO) method, and net realizable value.

Work in progress and finished goods

Work in progress and finished goods are measured at the lower of manufacturing cost and net realizable value. Manufacturing costs comprise all costs that are directly attributable to the manufacturing process, such as direct material and labor, and production related overheads (based on normal operating capacity and normal consumption of material, labor and other production costs), including depreciation charges.

Net realizable value is defined as the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. For purposes of determining net realizable value, selling expenses include all costs expected to be incurred to make the sale, primarily shipping, packaging and handling as well as commissions.

Obsolete inventories are written off directly into cost of sales.

Impairment of non-financial assets

The *Company* assesses at the end of each reporting period whether there is an indication that a non-financial asset may be impaired. The asset is tested for impairment if there are indicators that the carrying amounts may not be recoverable. An impairment loss is recognized in the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is defined as the higher of an asset's fair value less cost to sell and its value in use.

If the fair value less cost to sell cannot be determined, or if it is lower than the carrying amount, the value in use is calculated. The value in use is calculated by discounting the future expected cash flows at a risk-adequate pre-tax interest rate, current and expected future cash flows are taken into account, together with technological, economic and general development trends, on the basis of approved and adjusted financial plans.

3. Summary of significant accounting policies (Continued)

Financial instruments

Non-derivative financial assets and liabilities

The *Company* classifies non-derivative financial assets into the following categories: financial assets at fair value through profit or loss, held-to-maturity financial assets, loans and receivables and available-for-sale financial assets.

Available-for-sale financial assets are initially measured at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses and foreign currency differences on debt instruments, are recognized in other comprehensive income and accumulated in the fair value reserve. When these assets are derecognized, the gain or loss accumulated in equity is reclassified to profit or loss in other operating income or expense.

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognized initially at fair value. Subsequent to initial recognition, loans and receivables are measured at amortized cost using the effective interest method, less any impairment losses.

Non-derivative financial liabilities are initially measured at fair value less any directly attributable transaction costs. Subsequent to initial recognition, these liabilities are measured at amortized cost using the effective interest method. The *Company* does not elect to measure financial liabilities at fair value through profit or loss.

Impairment

Financial assets not classified as at fair value through profit or loss are assessed at each reporting date to determine whether there is objective evidence of impairment.

For financial assets measured at amortized cost, an impairment loss is calculated as the difference between an asset's carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognized in profit or loss and reflected in an allowance account. When the Group considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through profit or loss.

Impairment losses on available-for-sale financial assets are recognized by reclassifying the losses accumulated in the fair value reserve to profit or loss. The amount reclassified is the difference between the acquisition cost (net of any principal repayment and amortization) and the current fair value, less any impairment loss previously recognized in profit or loss.

Cash and cash equivalents

Cash and cash equivalents are short-term bank deposits and are not subject to a significant risk of change in value.

3. Summary of significant accounting policies (Continued)

Deferred income

Deferred income from sale and leaseback

Gains resulting from deferred income from 3D printers sold and leased back under finance leases are recognized within other operating income in the consolidated statement of comprehensive loss over the respective lease term.

Deferred income from extended warranty contracts

Extended warranty contract revenue is recognized on a straight-line basis per month as the costs of providing services incurred under the contracts generally do not vary significantly over the contract term.

Earnings (loss) per share

Basic earnings per share amounts are calculated by dividing profit (loss) by the weighted average number of ordinary shares outstanding. There are no dilutive instruments issued and outstanding.

4. New standards and interpretations not yet adopted

The IASB issued a number of new IFRS standards which are required to be adopted in annual periods beginning after December 31, 2015.

Standard	Effective date	Descriptions
IFRS 10,12, IAS 28	01/2016	Amendments Investment Entities: Applying the Consolidation Exception
IFRS 14	01/2016	Regulatory Deferral Accounts
IAS 1	01/2016	Amendments Disclosure Initiative
IAS 16, IAS 38	01/2016	Clarification of Acceptable Methods of Depreciation and Amortisation
IFRS 11	01/2016	Amendment Accounting for Acquisitions of Interests in Joint Operations
IAS 27	01/2016	Amendment Equity Method in Separate Financial Statements
IAS 16, IAS 41	01/2016	Amendment Agriculture: Bearer Plants
Improvements to IFRS (2012- 2014)	01/2016	IFRS 5, 7, IAS 19, 34
IAS 12	01/2017	Amendments Recognition of Deferred Tax Assets for Unrealised Losses
IFRS 15	01/2018	Revenue from Contracts with Customers
IFRS 9	01/2018	Financial Instruments
IFRS 16	01/2019	Leases
IFRS 10, IAS 28	indefinite	Amendment Sale or Contribution of Assets between Investor and its Associate or Joint Venture

The *Company* has not yet determined what impact the new standards, amendments or interpretations will have on the financial statements.

5. Critical accounting judgment and key sources of estimation and uncertainty

In the process of applying the *Company's* accounting policies, Management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. These estimates and associated assumptions are based on the knowledge available as of the preparation date of the financial statements and historical experiences as well as other factors that are considered to be relevant. The estimates and underlying assumptions are reviewed on an ongoing basis.

Developments outside Management's control may cause actual amounts to differ from the original estimates. In that case, the underlying assumptions and, if necessary, the carrying amounts of the pertinent assets and liabilities are adjusted accordingly. Revisions to accounting estimates are recognized in the period in which the estimate is revised, if the revision affects only that period, or in the period of the revision and future periods, if the revision affects both current and future periods.

The assumptions and estimates refer primarily to the recognition of revenue, the determination of the useful lives of property, plant and equipment, the application of the criteria for recognizing finance leases, the realization of receivables and customer loans, measurement of inventory, the recognition and measurement of provisions, the recognition and measurement of share based payment liabilities (LTCIP), and the impairment of goodwill.

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Revenue recognition

Revenue on sales of machines is recognized when the significant risks and rewards of ownership are transferred to the customer, the amount of revenue and cost incurred or to be incurred can be measured reliably and it is probable that the economic benefits associated with the sale will flow to the *Company.* On occasion, we grant a loan for a portion or all of the purchase price of a machine to a customer. We recognize revenue on such sales when it is probable that we will obtain the economic benefits from the transaction. In these situations, we analyze the credit risk associated with the customer based on all available information and the outstanding balance to determine the risk. The amount of revenue comprises the fair value of the consideration received, including future payments under the loan agreement. We typically retain legal title to our machines until receipt of all consideration to protect the collectability of any outstanding balances due, which does not preclude a conclusion that the significant risks and rewards of ownership have transferred.

Useful lives of intangible assets and property, plant and equipment

The estimated useful lives and amortization or depreciation methods for intangible assets and property, plant and equipment are based on the experience of the *Company* with similar assets that are used in a similar way. Additional amortization or depreciation, as applicable, is recorded if the estimated useful lives and/or the residual values are different from the previous estimation.

Criteria for classifying leases

A finance lease is an arrangement that transfers substantially all the risks and rewards incident to ownership of an asset to the lessee. Whether a lease is a finance lease or an operating lease depends

5. Critical accounting judgment and key sources of estimation and uncertainty (Continued)

on the substance of the transaction rather than the form of the contract. The criteria to classify a lease as a finance lease are as follows (one criterion is sufficient to meet the classification as a finance lease):

1. the lease transfers ownership of the asset to the lessee by the end of the lease term;
2. the lessee has a bargain purchase option and it is reasonably certain at the date of inception that the option will be exercised;
3. the lease term is for the major part of the economic life of the asset even if title is not transferred;
4. at the inception of the lease the present value of the minimum lease payments amounts to substantially all of the fair value of the leased asset;
5. the leased asset is of such a specialized nature that only the lessee can use it without major modifications;
6. gains or losses from the fluctuation in the fair value of the residual accrue to the lessee;
7. the lessee has the ability to continue the lease for a secondary period at a rent that is substantially lower than market rent; and
8. if the lessee can cancel the lease, our associated losses are borne by the lessee.

All of our leaseback arrangements for 3D printers transfer ownership of the asset to the *Company* at the end of the lease term, therefore, these leases are accounted for as finance leases.

Trade receivables

The *Company* evaluates customer accounts with past-due outstanding balances or specific accounts for which it has information that the customer may be unable to meet its financial obligations. Based upon a review of these accounts and Management's analysis and judgment, the *Company* estimates the future cash flows expected to be recovered from these receivables. The amount of the impairment on doubtful receivables is measured individually and recorded as a specific allowance against that customer's receivable balance so as to equal the amount expected to be recovered. The allowance is re-evaluated and adjusted periodically as additional information is received.

Inventories

Management reviews inventories on a product-by-product basis at the end of each reporting period to identify obsolete inventory items that are no longer suitable for use in production. Management estimates the net realizable value of finished goods, work-in progress and raw materials primarily based on current market conditions and on its experience in manufacturing and selling products of a similar nature. If net realizable value is lower than cost, an allowance is recorded.

Provisions and other liabilities

Provisions are recognized and measured on the basis of the estimate and probability of future outflows of resources embodying benefits, as well as based on the circumstances known at the end of the reporting period. Assumptions also are made as to the probabilities whether and within what ranges the provisions may be used. The assessment of whether a present obligation exists is generally based on assessments of internal experts. Estimates can change on the basis of new information and the actual charges may affect the performance and financial position of the *Company*.

Impairment of goodwill

The estimates related to the impairment of goodwill arising from the acquisition of *voxeljet UK* included the consideration of revenue and expenses in the underlying business plan. In addition, the interest rate used in the discounted cash flow model as well as the growth rate applied in the terminal value are subject to assumptions, uncertainties and judgments. As part of the preparation of the impairment test, Management used historical data regarding revenues, sale prices and expenses as well as forecasts related to the UK economy and its industry. Information regarding comparable companies in the *Company's* peer group was also considered.

Notes to the Statement of Financial Position

6. Trade receivables

Credit terms provided to customers are determined individually and are dependent on already existing customer relationships and the customer's payment history. The aging of trade receivables was as follows at each reporting date:

AGING STRUCTURE OF TRADE RECEIVABLES

	Year Ended December 31,	
	2015	2014
	(€ in thousands)	
Not due at the end of the reporting period	2,108	2,370
Amount past due for the following time ranges		
Less than 3 months	1,191	619
Between 3 and 6 months	44	150
Between 6 and 9 months	1	8
Between 9 and 12 months	4	1
More than 12 months	—	—
Total	**3,348**	**3,148**

The change in the allowance for doubtful accounts was as follows:

Change in the allowance for doubtful accounts

	Year Ended December 31,	
	2015	2014
	(€ in thousands)	
Balance at beginning of period	94	38
Charges	52	79
Release to income	(89)	(23)
Balance at end of period	**57**	**94**

7. Inventories

Inventories consisted of the following for the years reported:

INVENTORIES BY CATEGORY

	Year Ended December 31, 2015	Year Ended December 31, 2014
	(€ in thousands)	
Raw materials	621	473
Work in progress	6,095	3,735
Finished goods	1,125	1,039
Total	**7,841**	**5,247**

As a result of the restructuring of the *voxeljet UK* business, an impairment of raw materials and work in progress in the amount of €1.1 million was recognized in 2015. No impairments of inventories were recorded in 2014 and 2013.

As of December 31, 2014, within work in progress there was one unfinished VX4000 3D printer with a carrying amount of €0.7 million that served as collateral for a bank loan of the *Company.* In 2015 this 3D printer was installed in our German service center and transferred to property, plant and equipment with a carrying amount of €0.6 million as of December 31, 2015 and continued to serve as collateral for such bank loan.

8. voxeljet UK

Business acquisition

On October 1, 2014, we completed the acquisition of all outstanding shares of Propshop (Model Makers) Limited ("Propshop") which became voxeljet UK Ltd. ("voxeljet UK"), a wholly-owned subsidiary of the *Company*, supporting the film and entertainment industry, as well as the consumer market for on-demand 3D printing services.

voxeljet performed a preliminary purchase price allocation as of December 31, 2014 with respect to certain separately identified intangible assets. As of March 31, 2015, the *Company* adjusted the purchase price allocation according to the fair values of the intangible assets and deferred taxes. Intangible assets were reduced by kEUR 118 with a corresponding increase of the goodwill while

8. voxeljet UK (Continued)

deferred tax adjustments decreased goodwill by kEUR 263. The acquired assets and liabilities comprised the following items based on the adjusted purchase price allocation:

	October 1, 2014 Fair value (€ in thousands)
Current assets	514
Cash and cash equivalents	2
Trade receivables	211
Inventories	301
Non-current assets	3,936
Intangible assets	1,134
Property, plant and equipment	2,802
Total assets	**4,450**
Current liabilities	3,466
Financial liabilities	1,542
Trade liabilities	1,126
Accruals	200
Bank overdraft	71
Other liabilties	527
Non-current liabilities	1,430
Financial liabilities	1,430
Total liabilities	**4,896**
Net assets (liabilities) acquired	**(446)**
Purchase price	**967**
Goodwill	**1,413**

The intangible assets acquired in the business combination consisted of order backlog (kEUR 48), customer list (kEUR 622) and digital library (kEUR 464).

The order backlog was amortized until December 31, 2014. The customer relations and digital library were to be amortized over a period of three years.

The excess of the purchase price over the assets acquired and liabilities assumed was recorded as goodwill of €1.4 million. The goodwill resulted from synergies which relate to the expanded competencies obtained by *voxeljet* in the UK market and the skills of the *voxeljet UK* workforce.

In the fourth quarter of 2014, Propshop's operations contributed revenues of €0.9 million and a net loss of €1.1 million. The *Company* incurred acquisition costs of €0.2 million, which were recorded as administrative expense.

Restructuring of voxeljet UK

Following a review of the financial performance of *voxeljet UK* and its current market environment, Management decided in October 2015 to focus *voxeljet UK's* activities in the future solely on selling high-speed, large-format 3D printers and on-demand parts services to industrial and commercial customers.

8. voxeljet UK (Continued)

As a result, the *Company* entered into an agreement in November 2015 with an investor group that includes the founder of Propshop to sell certain assets supporting certain business lines that serve customers in the film and entertainment industry (the DPM business), transfer certain employees and contractual arrangements and settle the earnout and employment agreement with the managing director entered into in connection with the acquisition of *voxeljet UK* in exchange for net cash consideration of kEUR 365.

The charges from the restructuring of *voxeljet UK* amounted to €2.7 million and include a loss from the sale of fixed assets, the impairments of certain intangible assets separately identified in the business acquisition and inventories as well as payments for early termination of contracts and the transfer of employees. The following table summarizes the amounts relating to the restructuring charges.

		Year Ended December 31, 2015
Components of restructuring charges	**Line items in statement of comprehensive loss**	**(€ in thousands)**
Write-off digital library	Cost of sales	309
Impairment of inventories	Cost of sales	1,068
Write-off customer list	Selling expense	380
Separation and breach of contract	Administrative expenses	260
Legal consulting	Administrative expenses	79
Settlement of rent agreements	Research and development expenses	67
Loss on disposal of fixed assets	Other operating expense	67
Transfer of employees	Other operating expense	275
Derecognition of goodwill due to disposed business	Other operating expense	129
Settlement of loan agreements	Finance expense	29

With respect to the remaining goodwill arising from the acquisition of *voxeljet UK* of kEUR 1,273, an impairment test was triggered by the sale of the DPM business. *voxeljet UK* is considered as one cash-generating unit (CGU), which forms part of the Services segment.

The recoverable amount of this CGU was based on its value in use, determined by discounting the future expected cash flows to be generated from the continuing use of the CGU. The recoverable amount of the CGU of kGBP 2,975 was higher than its carrying amount of kGBP 2,263.

The key assumptions used in the estimation of the recoverable amount are set out below. The key assumptions represent Management's assessment of future trends in the relevant industries and have been based on historical data from both external and internal sources. Further, the recoverable amount is particularly sensitive to the achievement of the forecasted revenue.

In percent	**2015**
WACC	10.1%
Terminal value growth rate	2.0%

The discount rate was a pre-tax measure based on the rate of 10-year UK government bonds, adjusted for a risk premium to reflect both the increased risk of investing in equities generally and the systematic risk of the specific CGU.

8. voxeljet UK (Continued)

Five years of cash flows were included in the discounted cash flow model. A long-term growth rate into perpetuity has been determined with the comparable nominal gross domestic product (GDP) rates in the UK.

The forecasted projection on free cash flow was estimated taking into account past experience in the UK and the *Company's* service centers in Germany and the United States.

The estimated recoverable amount of the CGU exceeded its carrying amount by kGBP 712. Management has identified that a reasonably possible change in either the WACC or the revenue forecast could result in an impairment. In order to capture the sensitivity in revenues, the estimated revenue for the last year of the plan (2020) was adjusted, while keeping the assumed growth rate in terminal value unchanged. The following table shows the amount by which these assumptions would need to change individually for the estimated recoverable amount to be equal to the carrying amount.

Key assumptions	2015
WACC	2.5%
Revenue in the last year of the plan	kGBP 200

9. Intangible assets and goodwill

	Year Ended December 31,	
	2015	2014
	(€ in thousands)	
Software	279	74
Licenses	189	—
Customer list	—	601
Digital library	—	453
Prepayments made on intangible assets	159	187
Total	**627**	**1,315**

Due to the restructuring of the *voxeljet UK* business, the intangibles which arose from the business acquisition were impaired (refer to Note 8). The increase in software occurred as a result of the purchase of software licenses in connection with our new ERP system as well as related capitalized customizing cost. The increase regarding licenses was due to the acquisition of a specific license from a third party.

	Year Ended December 31,	
	2015	2014
	(€ in thousands)	
Goodwill	1,273	1,558

The decrease in goodwill mainly relates to the portion of goodwill allocated to the sold DPM business of *voxeljet UK* as well as the adjustment to the purchase price allocation as of March 31, 2015. (refer to Note 8).

10. Property, plant and equipment

	Year Ended December 31, 2015	2014
	(€ in thousands)	
Land, buildings and leasehold improvements	12,167	11,212
Plant and machinery (includes assets under finance lease)	7,702	6,486
Other facilities, factory and office equipment	1,413	1,240
Assets under construction and prepayments made	101	528
Total	**21,383**	**19,466**
Thereof pledged assets of Property, Plant and Equipment	592	—
Leased assets included in Property, Plant and Equipment:	**2,059**	**2,927**
Printers	1,490	2,246
Printers leased to customers under operating lease	500	645
Other factory equipment	69	36

The pledged assets consists of one 3D printer that serves as security for a certain credit line. Amounts added to plant and machinery relating to self-constructed 3D printers are considered non-cash transactions, which totaled to kEUR 3,943 and kEUR 392 in the financial years 2015 and 2014, respectively. During 2015, the Group acquired equipment with a carrying amount of kEUR 39 (2014: kEUR 0) under a finance lease.

The following table presents the composition of, and annual movement in, intangible assets and property, plant and equipment for the financial years 2015 and 2014, respectively:

2015

In December 2013, *voxeljet* purchased land, two production halls, and one building under construction in Friedberg, Germany for a total purchase price of €10.0 million. One of the production halls was previously leased by *voxeljet* from the seller; the lease was terminated as of December 31, 2013. The construction of the administrative building was completed by the end of March 2014. The relocation into the new building occurred in April 2014. In 2013, the *Company* committed to purchase additional land for €0.6 million, of which €0.2 million was paid in the second quarter of 2014.

In total, the *Company* has entered into sale and leaseback transactions for 17 self-produced 3D printers, which were sold to banks and leased back with the intention to be used in the Services segment for the purpose of producing custom-ordered printed products and ultimately to sell them to customers as used printers. As of December 31, 2015, the *Company* had six active leasing contracts compared to seven in 2014. In 2015, one contract was terminated, the 3D printer was repurchased from the lessor and sold to a customer.

In 2015 and 2014, there were no new sale and leaseback transactions. In 2013 the *Company* entered into sale and leaseback transactions for four self-produced 3D printers with sales proceeds of kEUR 1,900. In connection with these transactions the *Company* sold 3D printers with manufacturing costs of kEUR 851 in 2013. The gain of kEUR 1,049 from the sale was deferred and is amortized over the respective lease term. Three of the 3D printers are used in the Services segment and one was leased to a customer under an operating lease.

Leases of 3D printers are non-cash transactions for purposes of the cash flow statement.

10. Property, plant and equipment (Continued)

In connection with the sale of refurbished 3D printers to customers, the *Company* early terminated one finance lease in 2015 and three in 2014 and repurchased the applicable 3D printer from the lessor. Four other refurbished printers that had been carried as property, plant and equipment were sold to customers in 2015, while in 2014 only one other refurbished printer was sold to a customer.

Total	**3,581**	**2,457**

voxeljet has a Long-Term Cash Incentive Plan ("LTCIP") that provides for cash awards to non-executive employees. Under the plan, which was announced on October 2, 2013, the *Company* may grant individual award units of EUR 5,000 each up to a total maximum amount of 10% of the net proceeds received by the *Company* upon closing of its initial public offering. An initial grant of 684 award units was made to participants on October 2, 2013. The vesting of the awards occurs during three separate performance periods, with 20% of the awards vesting in performance period 1 ended December 31, 2013, 40% of the awards vesting in performance period 2 ended December 31, 2015, and the remaining 40% vesting in performance period 3 ending December 31, 2017. Vesting of the awards during performance period 1 was subject to a revenue growth target and the successful completion of the initial public offering. Both conditions for performance period 1 were met as of December 31, 2013. Therefore the awards regarding performance period 2 were paid in 2014.

On September 30, 2015, Management granted an additional 131 award units to eligible employees. At grant date the fair value measurement of the liability regarding performance period 2 included the assumption, that both the revenue growth as well as the share price target would be achieved. Furthermore, Management expected that the eligible employees would not leave the *Company* before the settlement of performance period 2. For the assumptions of the fair value measurement related to performance period 3 please refer to the section below.

In November 2015, Management decided to reduce the targets for performance periods 2 and 3 of the LTCIP granted awarded in October 2013 which were no longer probable of being achievable based on market conditions at the time of the modification. Although the targets for performance period 2 were adjusted, those targets were not achieved. Therefore there will be no payment related to the LTCIP for performance period 2.

11. Other liabilities and provisions (Continued)

Vesting of the award during performance period 3 is subject to performance and market conditions, including revenue growth and market capitalization as of December 31, 2017. In determining the fair value of the liability for the third period of the LTCIP, the *Company* estimates an 80% probability of achievement for each target, revenue growth and market capitalization. This estimation is based on consideration of current market conditions. Moreover, Management expects an employee turnover rate of 5.8% based on past experience (2014: 5.0%). The following table shows the development of the accrual regarding the LTCIP.

	(€ in thousands)				
	January 1, 2015	Usage	Addition	Reversal	December 31, 2015
Accrual for LTCIP	752	—	229	(503)	478

12. Financial instruments

Fair value is the price that would be received upon sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value hierarchy defines the following levels:

- Level 1: Quoted prices of the respective financial asset or financial liability in active markets
- Level 2: Other directly observable input parameters which contribute to establishing the fair value based on a valuation model
- Level 3: Input parameters not based on observable market data

Under IAS 39 there are the following categories:

(I) A financial asset or financial liability at fair value through profit or loss

(II) Held-to-maturity investments

(III) Available-for-sale financial assets

(IV) Loans and receivables

(V) Financial liabilities measured at amortized cost

12. Financial instruments (Continued)

The following tables list the carrying values and fair values of all financial instruments held by *voxeljet*:

12/31/2015	I.	II.	III.	IV.	V.	Fair Value	Level
Assets

Finance lease obligation	—	—	—	—	590	593	Level 2

The financial assets with a carrying amount of €32.0 million reported on the *Company's* statement of financial position at December 31, 2015 were comprised of investments in three bond funds (€30,661), a note receivable (kEUR 1,075) as well as the remaining unpaid interest from a customer loan (kEUR 10), all reported as current financial assets, and restricted cash (kEUR 206) reported as a noncurrent asset.

As of December 31, 2014 the financial assets with a carrying amount of €41.4 million were comprised of investments in three bond funds (kEUR 39,055), a note receivable (kEUR 1,013) and three customer loans (kEUR 1,074), all reported as current financial assets, and restricted cash (kEUR 247) reported as a noncurrent asset.

12. Financial instruments (Continued)

The fair value of the *Company's* investments in the bond funds was determined based on the unit prices quoted by the respective fund management company. The funds pursue the goal of daily liquidity and invest in short-term notes. The funds are open-ended; the units can be redeemed to the fund on a daily basis. Unit prices updated by the fund management company on a daily basis represent a quoted price in an active market.

The fair value of the note receivable due January 2016 was based on the secondary market price quoted by a broker.

The fair value of customer loans at December 31, 2014 was determined using a discounted cash flow model based on observable inputs from the relevant forward interest rate yield curve plus an appropriate risk premium.

The fair value of long-term debt was determined using discounted cash flow models based on the relevant forward interest rate yield curves. The fair value of finance lease obligations was determined using discounted cash flow models based on market interest rates available to the *Company* for similar transactions at the relevant date.

Due to the short maturity and the current low level of interest rates, the carrying amount of credit lines and bank overdrafts and customer loan at December 31, 2015 approximate fair value.

13. Cost of sales

Cost of sales includes personnel expenses, cost of material, purchased services, cost for finished goods and allocated indirect costs related to production.

COST OF SALES

	Year Ended December 31,		
	2015	2014	2013
	(€ in thousands)		
Personnel expenses	(5,386)	(4,287)	(3,133)
Material costs	(7,645)	(3,440)	(2,176)
Depreciation	(1,890)	(1,692)	(1,145)
Other expenses	(2,226)	(419)	(591)
Total	**(17,147)**	**(9,838)**	**(7,045)**

In 2015 other expenses consisted of rental expenses (kEUR 736), license fees (kEUR 440), travel expenses (kEUR 394) and tooling kits (kEUR 211). In 2014 and 2013, other expenses primarily consisted of rental expenses for manufacturing space.

14. Other operating income and expense

Other operating income includes primarily government grants received for ongoing research and development projects, the recognition of the gain on sale and leaseback transactions upon release from deferred income and gains from foreign exchange transactions.

14. Other operating income and expense (Continued)

The details of other operating income are presented for the years reported in the table below:

OTHER OPERATING INCOME

	Year Ended December 31,		
	2015	2014	2013
	(€ in thousands)		
Government grant income	322	208	260
Amortization of gain on sale and leaseback transactions	310	399	546
Recognition of deferred income due to early termination of sale and leaseback transactions	216	401	—
Reimbursement of transaction costs	108	86	—
Gains from foreign exchange transactions	863	290	4
Income from realized other comprehensive income	76	—	—
Other	235	—	84
Total	**2,130**	**1,384**	**894**

OTHER OPERATING EXPENSES

	Year Ended December 31,		
	2015	2014	2013
	(€ in thousands)		
Restructuring of business in UK	342	—	—
Expenses related to inital and secondary public offering	—	101	557
Losses from foreign exchange transactions	210	—	—
Derecognition of goodwill due to disposed business	129	—	—
Other	207	—	26
Total	**888**	**101**	**583**

15. Financial result

For the periods 2015, 2014 and 2013, the financial result was mainly driven by interest expense on finance leases, bank overdrafts and drawings under credit lines and long-term debt.

	Year Ended December 31,		
	2015	2014	2013
	(€ in thousands)		
Interest expense	(277)	(472)	(380)
Finance lease obligations	(201)	(114)	(198)
Bank overdrafts and lines of credit	(5)	(37)	(80)
Long-term debt	(41)	(195)	(73)
Other	(30)	(126)	(29)
Interest income	158	299	37
Payout of bond funds	116	201	—
Customer loans	7	50	18
Other	35	48	19
Financial result	(119)	(173)	(343)

16. Income taxes

Income taxes consist of the following for the years reported:

Income tax (expense) benefit

	Year Ended December 31,		
	2015	2014	2013
	(€ in thousands)		
Current tax (expense) benefit	—	—	—
Deferred tax (expense) benefit	(64)	32	(358)
Total	(64)	32	(358)

In 2015, 2014 and 2013, deferred tax (expense) benefit resulted from changes in deferred tax assets and liabilities on temporary differences.

16. Income taxes (Continued)

Deferred tax assets and liabilities

The components of net deferred income taxes at the end of the respective reporting periods were as follows:

SOURCES OF DEFERRED TAX ASSETS AND LIABILITIES

	Year Ended December 31,			
	2015		2014	
	(€ in thousands)			
	Deferred tax assets	Deferred tax liabilties	Deferred tax assets	Deferred tax liabilties
Trade receivables	—	(14)	—	(13)
Other receivables and current assets	—	—	—	—
Property, Plant & Equipment	299	(704)	53	(664)
Current deferred income	170	—	106	—
Trade liabilites	—	(1)	—	—
Other current financial liabilities	—	—	165	—
Current financial assets	—	(3)	—	(80)
Other current liabilities and provisions	28	—	—	—
Non-current deferred income	—	—	211	—
Non-current financial liabilities	356	—	423	(16)
Non-current financial assets	—	—	—	(17)
Intangible assets	—	—	—	(213)
Tax losses carried forward	—	—	—	—
Valuation allowance	(132)	—	(168)	—
Tax assets (liabilities)	721	(722)	790	(1,003)
Set off of tax	(721)	721	(790)	790
Net tax	**—**	**(1)**	**—**	**(213)**

At December 31, 2015 *voxeljet* had gross loss carry-forwards for corporation tax and trade tax losses of kEUR 10,335 and kEUR 10,090, respectively, for which no deferred taxes have been recognized. These tax losses can be carried forward without restriction for future offset against taxable profits. In addition, there are foreign tax loss carry-forwards of kEUR 9,309.

In addition, a valuation allowance of kEUR 132 on net deferred tax assets related to sale and leaseback transactions was recorded in 2015.

16. Income taxes (Continued)

Reconciliation of profit before income taxes to income tax

The reconciliation between profit before income taxes and income tax benefit (expense) for the reporting periods presented was as follows:

RECONCILIATION OF INCOME TAX BENEFIT (EXPENSE)

	Year Ended December 31,		
	2015	2014	2013
	(€ in thousands)		
Profit (Loss) before tax	(9,530)	(4,364)	(2,356)
Tax benefit at prevailing statutory rate (28%)	2,668	1,222	660
Non-deductible expenses	(47)	(25)	(23)
Tax-rate related differences	(259)	(44)	—
Unrecognized temporary differences and tax losses	(2,426)	(1,121)	(995)
Income tax benefit (expense)	(64)	32	(358)

17. Personnel expenses

Personnel expenses included in cost of sales, research and development, and selling and administrative expenses are comprised of the following:

PERSONNEL EXPENSES

	Year Ended December 31,		
	2015	2014	2013
	(€ in thousands)		
Wages and salaries	9,866	5,505	3,850
LTCIP	(274)	412	729
Social security contributions	1,732	1,050	930
Total	**11,324**	**6,967**	**5,509**

voxeljet AG offers to its employees a defined contribution plan called "MetallRente". The contributions paid by the *Company* amounted to kEUR 41, kEUR 30 and kEUR 23 for the years ended December 31, 2015, 2014, and 2013, respectively. The employer's contribution into the mandatory German state plan amounted to kEUR 511, kEUR 389 and kEUR 266 for the years ended December 31, 2015, 2014, and 2013, respectively.

18. Segment reporting

voxeljet operates in two reportable segments—Systems and Services—which reflect the internal organizational and management structure according to the distinct nature of the two businesses. The Systems business derives its revenues from the manufacture and sale of 3D printers, from the sale of consumables as well as lease and maintenance agreements with customers, while the Services business provides custom-ordered printed product to customers.

The measurement principles used by *voxeljet* in preparing this segment reporting are also the basis for segment performance assessment. The Chief Executive Officer of *voxeljet* acts as a chief operating

18. Segment reporting (Continued)

decision maker. As a performance indicator, the chief operating decision maker mainly monitors the *Company's* revenues and gross profit.

The following table summarizes segment reporting for each of the reporting periods ended December 31. As Management's controlling instruments are mainly revenue-based, the reporting information does not include a detailed breakdown of all assets and liabilities by category. The sum of the amounts for the two segments equals the total for the *Company* for each of the years presented.

SEGMENT REPORTING

	Year Ended December 31,					
	2015		2014		2013	
			(€ in thousands)			
	SYSTEMS	SERVICES	SYSTEMS	SERVICES	SYSTEMS	SERVICES
Revenues	11,113	12,951	9,057	7,106	6,343	5,345
Gross profit	3,849	3,068	3,301	3,024	2,505	2,138
Gross profit in %	34.6%	23.7%	36.4%	42.6%	39.5%	40.0%
PPE	9,002	12,381	7,322	12,144	4,913	11,403
Trade receivables	1,639	1,709	1,055	2,093	558	445
Trade payables	984	775	1,031	1,295	632	870
Depreciation and amortization (excl. Intangible assets)	775	1,813	425	1,503	174	1,309
Loss on disposal of DPM business	—	2,663	—	—	—	—

Systems revenues include revenues from the sales of used 3D printers of kEUR 1,224, kEUR 393, and kEUR 300 for the years ended December 31, 2015, 2014, and 2013, respectively.

Geographic information

REVENUES BY GEOGRAPHICAL REGION

voxeljet's revenues and non-current assets are presented below by geographic region. For purposes of this presentation, revenues are based on the geographic location of customers and assets are based on their geographic location.

18. Segment reporting (Continued)

voxeljet's revenues were generated in the following geographical regions for the years reported:

	Year Ended December 31,		
	2015	2014	2013
	(€ in thousands)		
EMEA	18,214	10,571	11,286
Germany	6,984	4,587	4,486
Great Britain	4,464	2,276	2,236
Others	6,766	3,708	4,564
Asia Pacific	2,703	4,306	142
South Korea	1,277	2,042	78
Others	1,426	2,264	64
Americas	3,147	1,286	260
United States	3,110	893	253
Others	37	393	7
Total	**24,064**	**16,163**	**11,688**

In 2015 and 2014 no customer represented 10% or more of total revenue. In 2013, the *Company* had one customer who represented 13% of total revenues.

In 2014, on two occasions the *Company* provided loans to customers to cover a portion of the purchase price of a 3D printer. The *Company* recognized revenue from the sale of these 3D printers upon acceptance by the customer at the fair value of the consideration received which was comprised of cash and the loan.

NON-CURRENT ASSETS BY GEOGRAPHICAL REGION

	Year Ended December 31,	
	2015	2014
	(€ in thousands)	
EMEA	20,748	21,823
Germany	19,017	19,195
Great Britain	1,731	2,628
Americas	2,822	763
United States	2,822	763
Total	**23,570**	**22,586**

19. Financial risk management

The *Company's* Management Board is responsible for implementing the finance policy and for ongoing financial risk management. Therefore the Management Board has established a Risk Management Committee, which is responsible for developing and monitoring of the Group's risk management policies especially regarding financial risks. Generally the committee provides an overview of financial risks on a quarterly basis to the Management Board as part of the *Company's* quarterly management reporting procedures.

The *Company's* principal financial instruments are comprised of short-term bank deposits at commercial institutions, bond funds, a note receivable, lease obligations and long-term debt. The main purpose of the financial asset instruments is to provide a return on investments with minimal risk. The main purpose of the financial liability instruments is to help fund the *Company's* operations. The *Company* has various other financial assets and liabilities including trade receivables and trade payables, which arise directly from its operations.

The main risks arising from the Group's financial instruments are foreign exchange risk and credit risk. The measures taken by Management to manage each of these risks are summarized below.

Transactions related to activities in the area of financial instruments require the prior approval of the Chief Financial Officer. The *Company* did not enter into any derivative financial instruments for hedging purposes in 2015.

Management receives a weekly reporting of the current liquidity of the Group by entity. Furthermore, a monthly cash flow plan meeting has been established, where Management reviews the cash forecasts and the future development of flows of funds on an ongoing basis.

Foreign exchange risk

The *Company* is exposed to foreign exchange risk to the extent that there is a mismatch between the currencies in which sales, purchases and borrowings are denominated and the respective functional currencies of subsidiaries of the Group. The functional currencies of the parent company *voxeljet AG* and its subsidiaries are Euro, US Dollars and British Pound Sterling. The majority of the sale, purchase and borrowing transactions are denominated in the functional currency of the parent company or its subsidiaries. The primarily driver of foreign exchange risk derives from the intercompany loans made to subsidiaries and the note receivable each as summarized below.

voxeljet has provided intercompany loans to its subsidiaries to finance their operations. The loans were granted in the local currency of the subsidiaries. Gains and losses from movements in exchange rates are recorded within other operating income or expense in the consolidated statement of comprehensive loss. As of December 31, 2015 the amount borrowed to *voxeljet UK* totaled GBP 6.6 million (€9.0 million). A relative increase in the value of the Euro against British Pound Sterling of 10% would lead to a loss of €0.8 million. The amount of loans granted to *voxeljet America* totaled to USD 4.5 million (€ 4.1 million) as of December 31, 2015. A relative increase in the value of the Euro against US Dollars of 10% would lead to a loss of €0.4 million.

voxeljet's financial assets include one note receivable denominated in British Pound Sterling in the amount of GBP 0.8 million (€ 1.1 million). A relative increase in the value of the Euro against British Pound Sterling of 10% would lead to a loss of €0.1 million.

19. Financial risk management (Continued)

For the year ended December 31, 2015, *voxeljet* generated 44.85% of its revenues in the eurozone. Additionally, the majority of the *Company's* sourcing transactions are also transacted in Euros in that zone.

The *Company* invoiced 75% in 2015, 90% in 2014 and 100% in 2013 of total revenues in Euro. As revenues in foreign currency usually correspond to costs which are incurred in the same currency, we consider the risk as minor.

The significant exchange rates which have been applied during the years presented are disclosed in Note 3.

Interest rate risk

voxeljet's principal interest-bearing positions are liabilities for bank borrowings and finance lease obligations. These liabilities are entirely at a fixed interest rate. As such, changes in market interest rates have no effect on future interest expenses.

Credit risk

Credit risk is the risk of the *Company* suffering a financial loss as the result of its counterparties being unable to perform their obligations. The *Company* is exposed to credit risk from its operating activities (mainly trade receivables and customer loans) and from its financing activities, including deposits and investments with financial institutions. Therefore, the carrying amount of cash and cash equivalents, financial assets, and trade receivables represents the maximum credit exposure of €37.4 million (2014: € 52.6 million).

The Company's exposure to credit risk is influenced by the individual characteristics of each customer. However, Management also considers factors that influence the credit risk of its customer base, including the default risk of the industry and the country in which the customer operates. *voxeljet* seeks to minimize such risk by entering into transactions with counterparties that are believed to be creditworthy business partners or with financial institutions which meet high credit rating requirements. In addition, the portfolio of receivables and customer advances is monitored on a continuous basis. Credit risk is limited to a specified amount with regard to individual receivables. As of December 31, 2015 there was only one customer loan, with only the current year interest payment unpaid and outstanding. The interest was fully settled in January 2016. As of December 31, 2014 there were three customer loans of €1.1 million in total. For an overview of the aging of receivables and the allowance for doubtful accounts refer to note 7.

The Group limits its exposure to credit risk by investing only in bond funds and note receivables which are fully guaranteed by the financial institutions and therefore represents short term credit rating of A-3 based on Standard & Poor's or P-2 based on Moody's.

The bank deposit are held with financial institutions, which are rated BBB to A2 based on Standard & Poor's and Moody's.

Liquidity risk

Liquidity risk is the risk that *voxeljet* might not have sufficient cash to meet its payment obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. *The Company's* approach to managing liquidity is to ensure, as far as possible, that it will have sufficient

19. Financial risk management (Continued)

liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the reputation of the *Company*. Liquidity risk is countered by systematic, day-by-day liquidity management whose fundamental requirement is that solvency must be guaranteed at all times. A major responsibility of management is to monitor the cash balances and to set up and update cash planning on a monthly basis to ensure liquidity. At all times cash and cash equivalents are projected on the basis of a regular financial and liquidity planning. The monitoring includes the expected cash inflows on trade and other receivables together with expected cash outflows from trade and other payables.

The following are the remaining contractual maturities of financial liabilities and trade payables at the reporting date. The amounts are gross and undiscounted and include contractual interest payments.

Year Ended December 31, 2015
(€ in thousands)

		Contractual cash flow					
	carrying amount	Total	2 months or less	2-12 months	1-3 years	3-5 years	More than 5 years
Bank overdrafts and lines of credit	384	(384)	(36)	(348)	—	—	—
Long-term debt	752	(807)	(25)	(206)	(355)	(221)	—
Finance lease obligations	1,305	(1,389)	(95)	(513)	(704)	(77)	—
Trade payables	1,759	(1,759)	(1,759)	—	—	—	—
Total	**4,200**	**(4,339)**	**(1,915)**	**(1,067)**	**(1,059)**	**(298)**	**—**

Year Ended December 31, 2014
(€ in thousands)

		Contractual cash flow					
	carrying amount	Total	2 months or less	2-12 months	1-3 years	3-5 years	More than 5 years
Bank overdrafts and lines of credit	448	(448)	—	(448)	—	—	—
Long-term debt	955	(1,042)	(25)	(211)	(439)	(294)	(73)
Finance lease obligations	2,101	(2,276)	(112)	(561)	(1,270)	(333)	—
Trade payables	2,326	(2,326)	(1,914)	(206)	(206)	—	—
Total	**5,830**	**(6,092)**	**(2,051)**	**(1,426)**	**(1,915)**	**(627)**	**(73)**

The *Company*'s short- and mid-term liquidity needs are currently covered. Due to the proceeds from the initial public offering as well as the follow-on offering, the *Company* considers the mid-term liquidity risk as minor.

20. Capital management

Management's aim is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

20. Capital management (Continued)

Equity is monitored by the *Company* using financial ratios. The equity used as a basis for determining the equity ratio corresponds to the equity disclosed in the Consolidated Statement of Financial Position.

Part of the capital management strategy is to reduce the number of sale and leaseback transactions for 3D printing equipment used in the production of printed products for customers. As a result of the *Company's* increased liquidity from its public equity offerings, certain lease contracts will be terminated prior to their scheduled maturity.

voxeljet's capital structure as of the end of the reporting periods 2015 and 2014 was as follows:

CAPITAL STRUCTURE

	Year Ended December 31, 2015	Year Ended December 31, 2014
	(€ in thousands)	
Equity	**61,469**	**71,300**
Share of total equity and liabilities	87.7%	87.9%
Current financial liabilities	1,150	1,241
Non-current financial liabilities	1,291	2,263
Total financial liabilities	**2,441**	**3,504**
Share of total equity and liabilities	3.5%	4.3%
Total equity and liabilities	**70,120**	**81,095**

21. Leases

Finance leases

Lessee

Future minimum lease payments under financing lease arrangements at the end of the considered reporting periods were as follows:

PRESENT VALUE OF MINIMUM LEASE PAYMENTS

	Year Ended December 31, 2015		
	Minimum future lease payments obligation	Unamortized interest expense	Present value of minimum future lease payments obligation
		(€ in thousands)	
due within 1 year	608	(49)	559
due between 1 and 5 years	781	(35)	746
due in more than 5 years	—	—	—
Total	**1,389**	**(84)**	**1,305**

21. Leases (Continued)

	Year Ended December 31, 2014		
	Minimum future lease payments obligation	**Unamortized interest expense**	**Present value of minimum future lease payments obligation**
		(€ in thousands)	
due within 1 year	658	(81)	577
due between 1 and 5 years	1,572	(91)	1,481

Total	**2,230**	**(172)**	**2,058**

Operating Leases

Lessee

The estimated payment schedule regarding operating leases at the end of the considered reporting periods was as follows:

OPERATING LEASE OBLIGATIONS

	Year Ended December 31,	
	2015	**2014**
	(€ in thousands)	
Less than 1 year	507	479
1 to 5 years	857	1,399
Over five years	—	—
Total	**1,364**	**1,878**

Operating lease expenses were kEUR 813, kEUR 348, and kEUR 377 in the financial years 2015, 2014, and 2013, respectively. Operating lease expenses are primarily related to the rental agreements for real estate regarding our foreign operations and a new rented building at our German headquarters put in service in 2015.

Lessor

voxeljet leased five of its self-produced 3D printers to customers. Under the lease contracts, *voxeljet* bears a majority of the substantial risks and rewards of the underlying assets.

At December 31, 2015 and 2014, amounts of kEUR 0 and kEUR 276 were accrued for Management Board compensation.

voxeljet's Chief Executive Officer agreed to personally guarantee EUR 75,000 of a loan from Bayerische Hypo- und Vereinsbank AG, Munich, Germany, to the *Company*. Three of the shareholders of *voxeljet* pursuant to an agreement, dated September 1, 2010, each agreed to reimburse the Chief Executive Officer EUR 18,750 in case *voxeljet* defaults on the loan and the Chief Executive Officer was required to pay any sums under his personal guarantee. The *Company* paid an interest rate of 6.00% per annum on the guaranteed amount to each guarantor. The guarantee and the agreement with the shareholders were terminated in March 2014.

Transactions with related parties

A related party relationship could have an effect on the profit and loss and financial position of the *Company*. Defined as related parties are individuals or other third parties with whom *voxeljet* has common control relationships.

OTHER RELATED PARTIES

Name	Nature of relationship	Duration of relationship
Franz Industriebeteiligungen AG, Augsburg	Owner	10/01/2003-Current
Schlosserei und Metallbau Ederer, Dießen	Supplier	05/01/1999-Current

The main transactions with other related individuals were the following:

Franz Industriebeteiligungen AG, Augsburg, Germany, is owned by Mr. Rudolf Franz who worked as an external consultant at *voxeljet* until June 30, 2013. Since July, 1, 2013, he has been the Chief Financial Officer of *voxeljet AG*. For his external consulting services, Franz Industriebeteiligungen AG, received compensation on a regular basis which was split into a fixed and variable component, amounted to the following: kEUR 99 (kEUR 70 fixed and kEUR 29 variable) for 2013. Other transactions with Franz Industriebeteiligungen AG comprise the rental of office space in Augsburg, Germany. Rental expenses amounted to kEUR 2, in each of 2015, 2014 and 2013. In addition, Franz Industriebeteiligungen AG received payments related to the use of certain paintings which are placed in the administrative building in Friedberg. Associated rental expenses amount to kEUR 2 in each of 2015, 2014, and 2013.

Further, *voxeljet* acquired goods amounting to kEUR 38, kEUR 29, and kEUR 20 in 2015, 2014 and 2013 from 'Schlosserei und Metallbau Ederer', which is owned by the brother of Dr. Ingo Ederer, the Chief Executive Officer of *voxeljet*.

24. Equity

On October 23, 2013, the *Company* completed its initial public offering of 7,475,000 American Depositary Shares ("ADSs") at a public offering price of USD 13.00 per ADS. Of the 7,475,000 ADSs sold in the public offering, 5,600,000 were sold by the *Company* and 1,875,000 were sold by its

24. Equity (Continued)

shareholders (the "Selling Shareholders"). As a result of the offering, the *Company* received net proceeds of approximately USD 64.5 million, or approximately €46.8 million, after deducting underwriting discounts and commissions and €2.2 million in offering costs.

On April 16, 2014, the *Company* completed a follow-on offering of 3,000,000 ADSs at a public offering price of USD 15.00 per ADS. Net proceeds from the follow-on offering to the *Company* were approximately USD 41.4 million. On April 24, 2014, the underwriters in the follow-on offering purchased 450,000 ADSs from the Selling Shareholders pursuant to the overallotment option they were granted in the follow-on offering. The net proceeds to the Selling Shareholders were approximately USD 6.4 million, or approximately €4.6 million. The *Company* did not receive any proceeds from the sale of ADSs by the Selling Shareholders.

At December 31, 2015, 3,720,000 no-par value ordinary shares were issued and outstanding. There is only a single class of ordinary shares with the same rights, preferences and restrictions. Each share entitles the holder to one vote at the shareholders' meeting. Shareholders participate in the profits according to their share in the share capital, based on their number of shares held. The general shareholders' meeting resolves the appropriation of the balance sheet profit established in the annual financial statements and the dividends.

The Articles of Association authorize the Management Board, subject to the consent of the Supervisory Board, to increase the *Company's* registered share capital in one or more tranches by up to kEUR 1,860 new no par value ordinary shares against contribution in cash or in kind until May 26, 2019.

25. Subsequent Events

In February 2016, *voxeljet* concluded three loan agreements with Kreissparkasse Augsburg, Germany, in an aggregate amount of €4.0 million to finance the construction of new office and production facilities in Friedberg comprised of (i) a loan agreement in the amount of €2.0 million with a fixed interest rate of 2.47% per annum due December 30, 2025, (ii) a loan agreement in the amount of €1.0 million with a fixed interest rate of 2.72% per annum due December 30, 2030 and (iii) a loan agreement in the amount of €1.0 million with a variable interest rate of 1.75% per annum, which can be terminated by either party upon three months' notice. Among other terms, the loan agreements contain (i) certain covenants, including that *voxeljet* deposit €2.0 million with Kreissparkasse Augsburg until it has reached certain ratio with respect to its ability to service the debt by the end of 2019, and (ii) change of control provisions concerning the ownership of the Company by its executive officers, Dr. Ingo Ederer and Rudolf Franz. In case *voxeljet* fails to meet that ratio by the end of its business year 2019, *voxeljet* is obliged to pledge €2.0 million for the benefit of the lender. In addition, the land owned by *voxeljet* upon which the facilities will be built will serve as collateral under the loan agreements. Management expects that construction will commence in May 2016.
